HOW TO ORDER

Use Our Order Sheet—In making out your order please use the convenient Order Sheet, which is enclosed with each catalogue. If it is necessary to write a letter in addition, let it be on a separate sheet.

Plants—Small plants can be sent by mail if so desired, but we strongly advise our customers to have their plants sent by express at their expense, as larger and finer plants can be sent in this way, and "extras" are added to help defray charges, and we always ship in this way unless instructed to the contrary. Winter blooming plants are generally sent in paper pots.

NO COMPLAINT ENTERTAINED UNLESS MADE WITHIN FIVE DAYS AFTER RECEIPT OF GOODS.

We do not warrant in any way, expressed or implied, the contents or the description, purity, productiveness or any other matter of any seeds, bulbs or plants sold by us, and we will not in any way be responsible for the crop. If the purchaser does not accept these goods on the above terms no sale is made thereof, and he must return them at once, and the money will be refunded. Subject to the

above conditions we make this sale at the moderate prices at which we sell our goods.

How to Send Money—Send remittance by money order, draft or check. If sent by check, stamps will be accepted only for orders less than \$1.00. If paper money is sent, send it by registered letter. Do not remit with silver money.

Directions—It is most important to have your full name and address on order as plain as possible, and while we exercise the utmost care in filling all orders to the entire satisfaction of the customer, an error is liable to occur at times. In such events, it is our desire to be promptly notified of the fact so we can make such corrections as will be satisfactory. Complaints, if any, should be made immediately upon receipt of goods, so we can place the responsibility and correct the matter in time.

IMPROVED GIANT PANSIES

Everyone is fond of Pansies, and every one, rich or poor, should have a bed of them. They are easily grown and a constant delight.

For the largest and finest Pansies, the seed must be sown in the early

fall. It is best to plant in the open ground, in August if possible. Transplant the young seedlings to permanent location as soon as large enough, say in September. They will then have time to form good strong roots before the ground freezes. The last of November protect the plants with a covering of leaves or straw about three inches deep. Grown in this manner, early, robust, large-flowering Pansies will result. When the seed is sown later, the young seedlings should be wintered over in cold frames, and will still produce much earlier and larger flowers than from spring-sown seed.

YOUNG'S SUPERIOR MUSHROOM SPAWN

One pound of spawn is enough for a bed 2 by 6 feet.

Mushrooms are considered a great delicacy by everyone and are always in much demand at fancy prices. Many are devoting their spare time to mushroom culture and are getting big returns for their labor. Nearly everyone has some unused place that might be devoted to mushroom growing. They can be grown in dark rooms, caves, cellars or under greenhouse benches, where the temperature can be maintained at from 50 to 60 degrees.

We furnish with each order a leaflet, giving complete cultural directions. One brick is required

for ten square feet of bed. It is put up in bricks weighing about 1½ pounds each.

Pure Culture Spawn—A new departure in the cultivation of mushroom spawn. This method insures the reproduction of a certain type, free from all inferior sorts, that will largely increase the yield and produce the very best mushrooms. **40c** per brick, 2 for **75c**, by mail, postpaid. Festiva Maxima Peony

Young's Peonies

**Most Popular of All Hardy Plants,
and Growing in Favor.**

Everyone knows the old-time "Piney" of our grandmother's garden, and how indispensable they were. Now, since we have many vastly improved varieties, no garden is complete where they are omitted. Being perfectly hardy they endure the severest winters, have no insect pest, and are not subject to diseases of any kind. Once planted they remain, increasing in size from year to year. They begin blooming almost at once, yet they do not reach their highest perfection until about the third season. Are easily grown and do well almost anywhere, but a rich, deep soil and sunny place suits best, producing finer bloom with brighter colors. An abundance of water while growing, and when in bloom, is good also. They are profuse bloomers and rival the finest rose in beautiful colors. Foliage rich and massive; a handsome plant, even when not in bloom, whether planted alone on the lawn or with other plants or shrubs.
